## About Us

BBS Architects, Landscape Architects & Engineers, P.C. is a NY-based, ENR New York Top 100 design firm. We continually strive for excellence in providing integrated architectural, landscape architectural and MEPT engineering solutions to help our clients successfully plan, design, and build their projects.

At BBS, employees are part of a multi-disciplined firm with a wide range of consulting services located in-house, successfully delivering projects for over 40 years in the K-12, Higher Educational and Municipal markets. With 75% of our valued staff being employed at BBS for over 10 years, and many for over 20 years, our vision is long term, and it includes the most talented individuals in the industry. At BBS you will contribute to a wide range of projects that help our clients understand the challenges placed before them today while connecting them to the future. We support a workplace culture that encourages innovation, creativity, and camaraderie.

We are currently seeking talented individuals for the following positions in our Patchogue office:

### Project Architect

This position requires 5 years of experience in architectural design and production of architectural construction drawings for municipal, institutional, and commercial projects. Candidate should have experience in field measuring, drawing production, interface with MEP engineering, and client interaction. This position typically works on a team of professionals under the direction of a Project Manager. Fluency in Revit and Microsoft Office suite programs is required. Professional licensure is not necessary but is a plus.

### Civil Designer

This position requires 3+ years of experience in civil/site design and direct production of construction drawings for municipal, educational, and commercial projects. Candidate should have experience in design of parking lots, athletic fields, public parks, grading and drainage projects, and low-level client contact. This position typically works on a team of professionals under the direction of a Landscape Architect or Civil Engineer. Fluency in AutoCAD and Microsoft Office suite programs is required. Professional licensure is not necessary.
